HD WALLS DIGITAL FOR PROJECTS

HD WALLS DIGITAL is often used in various projects such as hotel, restaurant, cafe, school, office or residence projects. Either a custom design or a design from our collection or a mixture of them both is used in those projects. In addition to our regular paper types, we can find a special wallpaper in a special color that you wish to be printed on for your project over 500 square meters.

HD WALLS DIGITAL provides wide range of designs which are all customizable upon wall dimensions or special requests. Other than the designs that we have, We could also purchase any design from Shutterstock platform that you wish us to print on free of charge. Other than that, you can share your high resolution file with us and we can print on the material you like. There is no price difference between printing a regular design from our collection or a special design that you request from us. The only price difference would occur from different paper types.

We provide samples in 50 cm. x 50 cm. or larger depending on request for your project and you can see the actual print of the design that you wish to purchase on the paper type you wish.

Our aim is to give you the total flexibility and feasibility when you decide to purchase a digital wallcovering from us.
